SUMMARY

Enthusiastic MERN Stack Developer with hands-on experience in building scalable full-stack web applications using React, Node.js, Express, and MongoDB. Skilled in building 100% responsive, user-friendly interfaces optimized for mobile, tablet, and desktop devices with clean and maintainable code.

SKILLS

- **Front-end:** React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
- **Back-end:** Node.js, Express.js, RESTful APIs, JWT Authentication, Payment Integration
- **Database:** MongoDB, MongoDB Atlas
- **Tools:** Git, GitHub, Postman, Firebase, Cloudinary, Render, Vercel
- **Programming:** C, Java, Object-Oriented Programming (OOP)

INTERNSHIP & TRAINING

- **React.js Trainee – The Entrepreneurship Network** *Aug 2025–Oct 2025 (3 Months)*
 - Built 8 responsive UI components in React, reducing UI-related bugs during QA.
 - Collaborated with a small team to plan, develop, and test features in a development environment.
- **MERN Stack Trainee – WsCube Tech** *Jan 2025–Jul 2025 (7 Months)*
 - Architected and tested 2 MERN applications with modular, scalable architecture.
 - Integrated Razorpay sandbox to simulate secure transactions and validate payment flows, reducing test errors by 10%.
 - Refactored backend APIs and MongoDB queries, improving response time by 20% in local testing.

PROJECTS

- **CodeVista – Learning Management System (MERN)** *GitHub | Live Demo*
 - Implemented secure payment simulation using Razorpay sandbox and AI-powered course search to enhance user experience and improve course discovery.
 - Engineered role-based dashboards with content management and live progress tracking.
 - Designed and implemented RESTful APIs to enable seamless communication between frontend and backend, ensuring scalable and efficient data flow.
- **OneCart – E-Commerce Platform (MERN Stack)** *GitHub | Live Demo*
 - Created dynamic product listings, cart, and inventory management systems for an e-commerce application in a local testing environment.
 - Built JWT authentication and sandbox payment workflows.
 - Enhanced API request handling, achieving 15% faster responses in QA testing.
- **AI Virtual Assistant – React & Gemini API** *GitHub | Live Demo*
 - Created a voice-enabled assistant to handle common user queries in a simulated environment.
 - Added speech recognition and text-to-speech for real-time voice interaction.
 - Enabled multi-step voice interactions to make task execution smoother and more user-friendly.

EDUCATION

- **Allenhouse Institute of Technology** *Aug 2021–Jun 2025*
Bachelor of Technology in Computer Science and Engineering

CERTIFICATIONS

- **MERN Stack Development – WsCube Tech** *View Certificate*
Built and deployed a full-stack application with core features like CRUD operations and secure authentication in a practice environment.
